Bond Home - Fireplace

Compatible Control4 Systems:

Designed to work with OS 3.x+

Driver Download, Change Log & Documentation:

Content

Dealer Notes

- Fireplace may contain a fan or light which will have control output connections that can be linked to the Bond Fan or Bond Light driver, respectively.
- Lights will have control output connections that can be linked to the Bond Light driver.
- Bond Fireplace can be controlled using a Relay connection (ex. can be used with Control4's fireplace timer)

- By default the Bond Fan will be shown under Comfort in the installed room
- In addition to the main toggle button there are two other buttons provided by the driver: Increase Flame and Decrease Flame
- These buttons increase or decrease the fire level by the amount set in the *Flame Increase/Decrease Amount* property

---

Driver Setup

1. Connect driver with a Bond Bridge fireplace
2. Set Fireplace and Button Settings accordingly
