E X P E R I E N C E

Normal

Verified

Once the code is verified a control widget will appear that will provide the ability to trigger the following relay commands:
· Open
· Toggle
· Close

These are also available as events in programming to allow for further customization.

Notes

· Make sure to allow for enough time to control the relay connection
· If Control relay connection is not made when using the code type, the driver will enter an OFFLINE state
· Though the driver can be bound to any relay binding there may be limitations
