

White Paper: Dealer Agent

09.09.2021

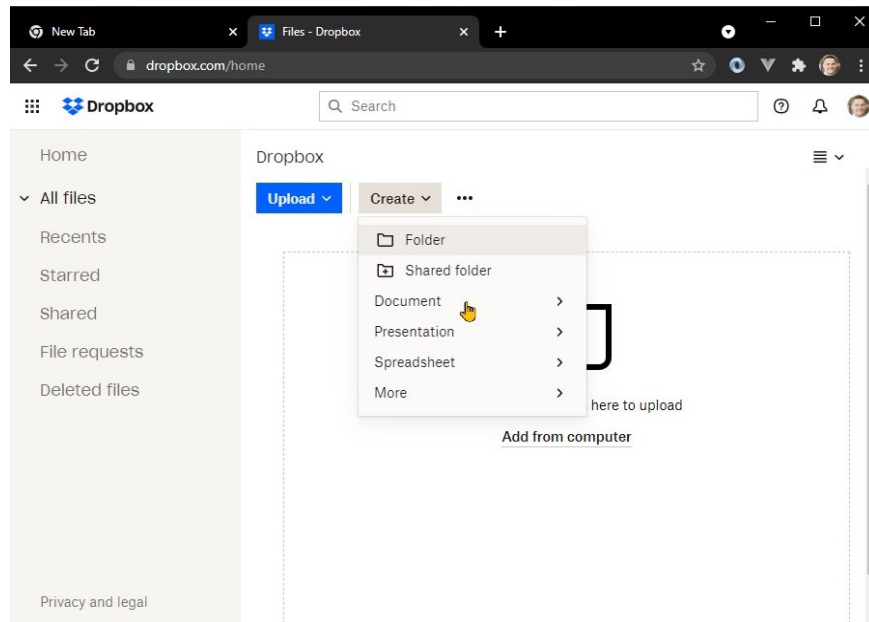

[Dropbox \(web\) - Make Public Image URL](#)

In order for the Dealer Agent to display photos of the business logo and/or the customers home they need to be made available publically and the public url needs to be provided in the driver.

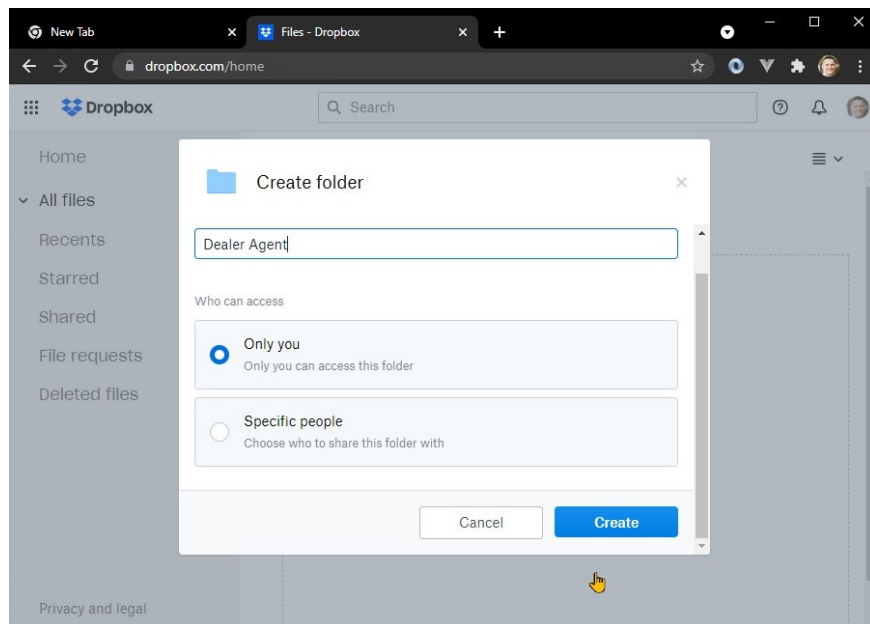

Here are instructions on how to use Dropbox (web) to make publicly available photos.

Create Dropbox folder to store photos:

After logging in to Dropbox select 'All files' and create a new folder

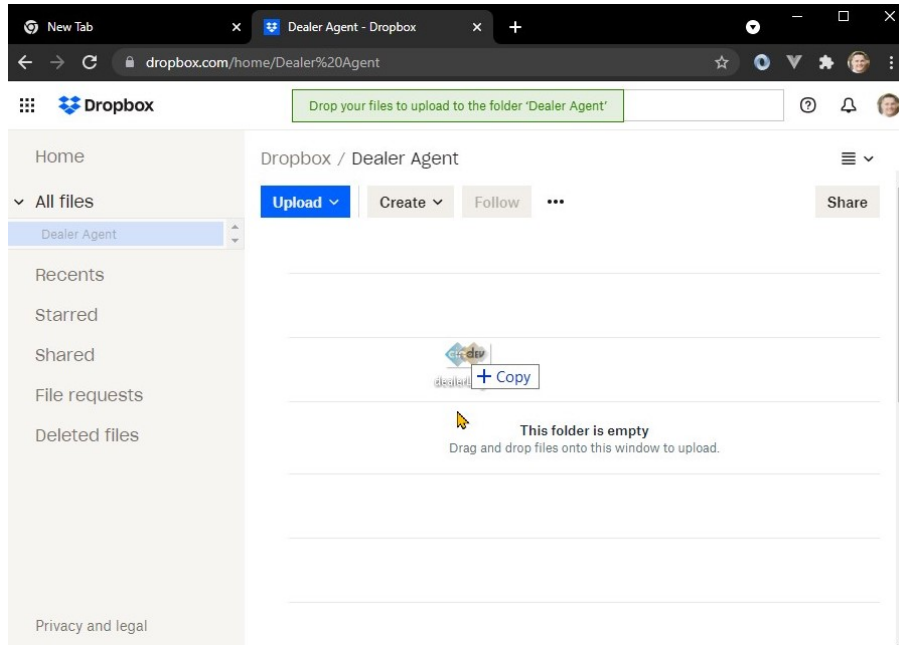

Name the new folder

Add your business logo and photo of the home (if applicable):

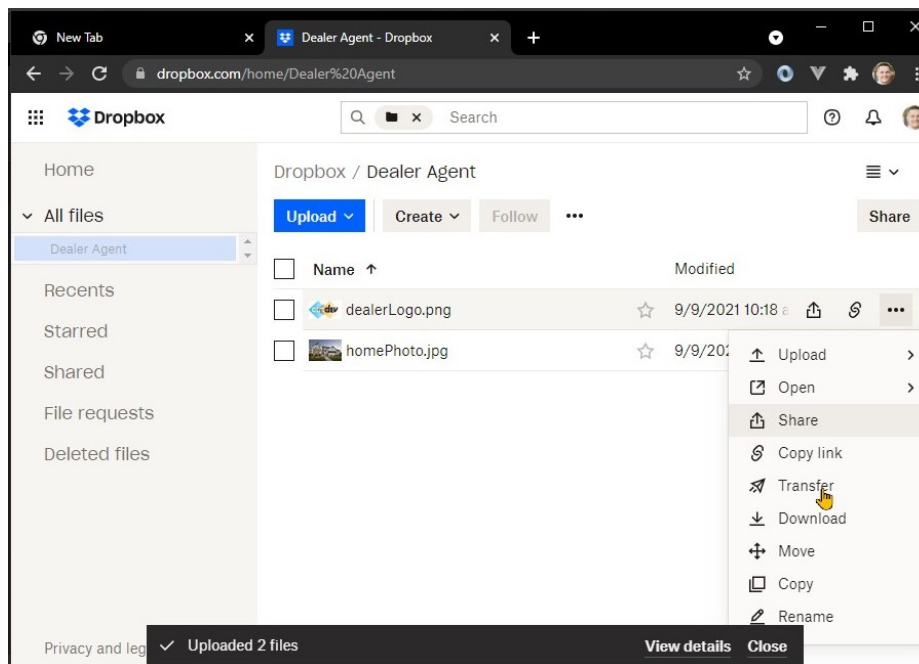

Photos should not exceed more than 800px. Larger photos slow loading time of the webview.

Drag and drop the photos into the created folder

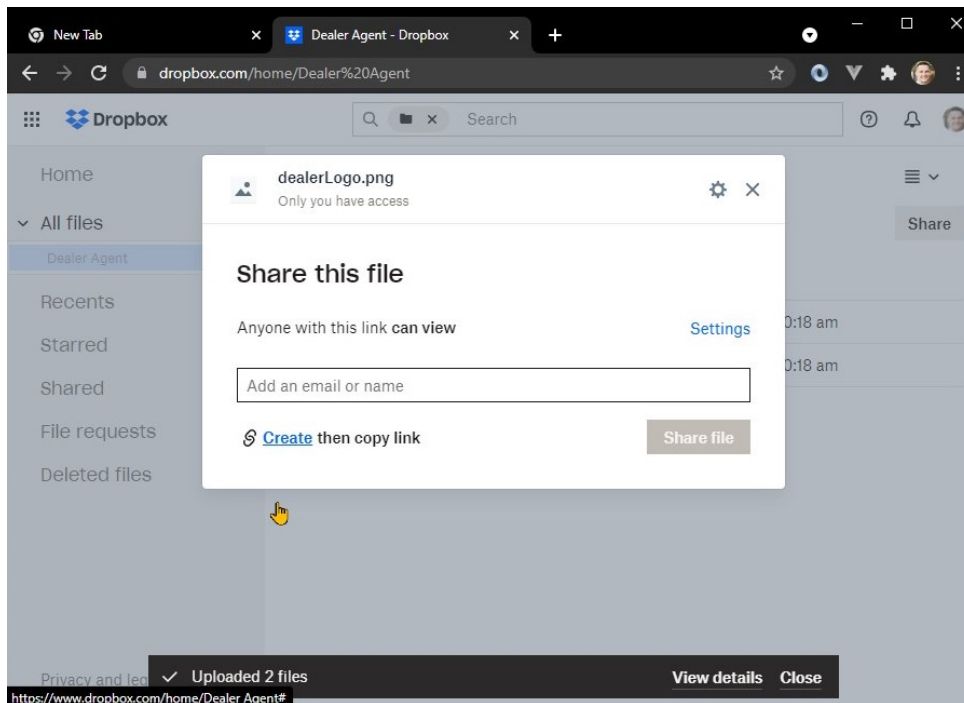

Obtain photo URL:

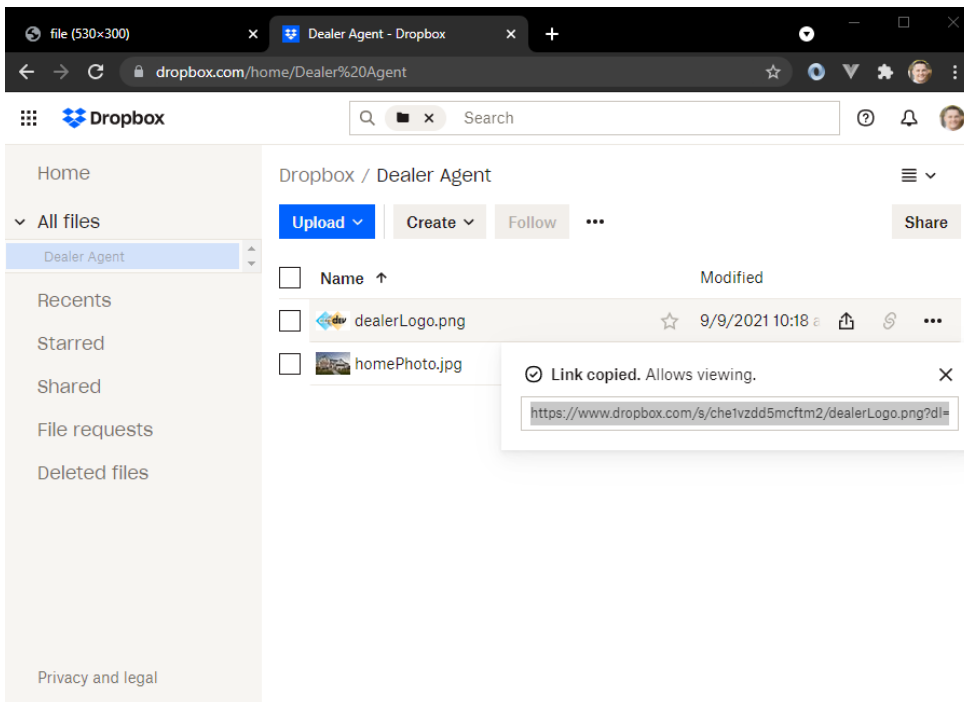

Right click on the photo and select 'Share'

Select 'Create'

Copy created link

Enter link in Composer and update the url to make the photo linkable:

Remove the last portion of the URL 'dl=0'

Address	Used with Google API to display dealer location on touchscreens		
Address Line 1			
Address Line 2			
Address Line 3			
Logo	https://www.dropbox.com/s/che1vzdd5mcfm2/dealerLogo.png?dl=0	Set	Cancel
	Enter URL of your company's publically available logo		
Home Photo			
	Enter URL of publically available photo of the home		

Replace it with 'raw=1'

Address	Used with Google API to display dealer location on touchscreens		
Address Line 1			
Address Line 2			
Address Line 3			
Logo	https://www.dropbox.com/s/che1vzdd5mcfm2/dealerLogo.png?raw=1	Set	Cancel
	Enter URL of your company's publically available logo		
Home Photo			
	Enter URL of publically available photo of the home		

You are now done! Your photos stored in Dropbox will now be visible on the Dealer Agent Webview.
