Driver Setup

1. Apply for Govee API key: [Govee Developer Portal](#)
2. Enter the API Key into the 'API Key' property under 'Govee Settings'.
3. Driver will discover your Govee devices and create connections.
4. Bind to proxy Govee drivers in Connections

Dealer Notes

The driver communicates with Govee devices via the cloud. A stable internet connection is required. The Govee API has a rate limit of 10,000 requests per day. If you are experiencing issues, you can use the 'Refresh Communication' action to re-discover devices and the 'Reset Driver' action to clear all settings and start over.

Driver Properties

- *Cloud Status*: Displays driver license state
- *Driver Status*: Displays driver related information
- *Driver Version*: Displays driver version
- *Driver Actions*:
 - *Refresh Communication*: Re-scans for Govee devices on your account.
 - *Reset Driver*: Clears all driver settings, including the API key and device information.
 - *Automatic Updates*: Allows the 'Cloud Driver' to automatically update the driver when a new version is available
 - *Debug Mode*: Displays additional information on the lua tab for debugging purposes

Govee Settings

- *API Key*: Your Govee API Key.
- *Devices*: A list of discovered Govee devices.
- *Connection*: The current connection status to the Govee cloud.

Support

If you require additional driver assistance or are having some issues please visit our help desk: <https://help.drivercentral.io>

Showroom and Free Trial

All Cindev drivers for Control4 come with a 7-day trial. Simply add the DriverCentral licensing driver, *Cloud Driver*, along with this driver and you can fully test the driver before purchasing. Including Cindev drivers in your drivercentral showroom project will give you unlimited use without purchase.
