

Mark Levinson No. 523 or No. 526

Overview

Connects via RS232 the beautiful No. 523/526 Preamplifier. Driver creates a receiver connection for dealer to integrate.

Installer Tips

- Once you make your connections, be sure to Setup Communications
- We have added a 'hide-all' feature to automatically hide the driver in ALL rooms so you do not need to go to each room in Control4 and hide the receiver

Installation

- 1) Install all driver c4z files in your Control4 drivers' folder.
- 2) Add driver into project by searching for Mark Levinson and choosing the No. 526 driver. The 523 and 526 use the same API
- 3) Make connections
- 4) Click on Driver Actions: Setup Communication

DriverCentral (for auto update)

Step-by-step tutorial available at cloud.drivercentral.io

- 1) Create your project in the DriverCentral.io project portal. This will generate your project token.
- 2) Download and load the DriverCentral.io cloud driver into your project, you only need one per a project.
- 3) Use your project token that you have from step one and input it into the "Project Token" properties field within the cloud driver in your Control4 project.
- 4) Once you have your project connected with DriverCentral.io your driver will be automatically licensed, and auto update will be active.

Change Log

Version 1000 - Release

Warranty

Cinegration strives to provide fully working drivers without defects. However, changes and bugs may be found. Because of this, any bug/maintenance update to this driver will be free of charge. However, due to the ever-changing nature of computer and audio/video systems, if a new version of the Control4® software creates issues with this driver, or feature enhancements, an upgrade version will be provided.
