Features/Overview

- Creates a simple way to go to a webpage on a Control4 touchscreen
- Composer Action to dynamically change the url from programming
- Create a support webpage for your clients
- Create a link to a YouTube video
- Add this driver to the Watch, Listen, Comfort, Security or main page
- Add as many URL Agent drivers you need

Dealer Notes

This driver uses the Control4 Webview UI feature that is only T3 and T4 Control4 Touchscreens. Note: T3 Touchscreens use a very old Chrome browser so some website might not load properly or take a long time to load.

Setup

- Enter url (full url including http). Example: <https://www.cindev.com>
- Show Icon in room Navigators
- Refresh Navigators

Driver Properties

- Driver Actions
 - Show Icon in All Rooms Security: Will show this driver in all rooms under Security Tab
 - Show Icon in All Rooms Comfort: Will show this driver in all rooms under Comfort Tab
- Current URL: This is the url the webview will launch when the driver icon is pressed.

Connections

None
