

Compatible Control4 Systems: 2.9.1 +

Compatible Hardware: August Smart lock w/ August Connect

Developed by: Cinegration LLC. www.cinegration.com/drivers

You must have your August lock linked to August Connect

Setup

- Setup your August Smart lock with August Connect iOS or Android app and verify functionality prior to integrating.
- Add (1) August Gateway driver.
- Enter customers email address in the email field. The customer will receive an email with a link to connect their August lock to Control4.

Note: If the customer does not receive the email, instruct them to check their email spam folder.

You have requested that Control4 is given access to your August lock. Please follow the link below to grant access.

[Click Here](#)

- When the customer successfully authorizes Control4 access to the driver you may move on to the next steps.
- Add (1) August lock and (1) Control4 Generic Door Lock for each lock that is in your August account.
- For each lock Bind your August Smart Lock “AUGUST_LOCK” connection to the appropriate binding on the gateway.

| Name | Type | Connection | Input/Output | Connected To |
|------------------------|---------|-------------|--------------|---|
| Control Inputs | | | | |
| Lock | Control | AUGUST_LOCK | Input | August Gateway->Guest House- Front Door |
| Control Outputs | | | | |
| Lock S | Control | RELAY | Output | Door Lock->Relay |

-
- For each lock bind your August Smart Lock “RELAY” binding to the Control4 Generic Door Lock.

| Name | Type | Connection | Input/Output | Connected To |
|------------------------|---------|-------------|--------------|---|
| Control Inputs | | | | |
| Lock | Control | AUGUST_LOCK | Input | August Gateway->Guest House- Front Door |
| Control Outputs | | | | |
| Lock State | Control | RELAY | Output | Door Lock->Relay |

-
- If you own a August Smart Lock with DoorSense, an additional contact sensor binding will be made available on the August Lock driver. You may combine this contact sensor binding with the generic Door Contact Sensor.

DriverCentral

- Create your project in the DriverCentral.io project portal. This will generate your project token.
- Download and load the DriverCentral.io cloud driver into your project, you only need one per a project.
- Use your project token that you have from step one and input it into the “Project Token” properties field within the cloud driver in your Control4 project.
- Once you have your project connected with DriverCentral.io your driver will be automatically licensed and auto update will be active.

Warranty:

Cinegration strives to provide fully working drivers without defects. However, changes and bugs may be found. Because of this, any bug/maintenance update to this driver will be free of charge. However, due to the ever-changing nature of computer and audio/video systems, if a new version of the Control4® software or API changes create issues or new features are added, a new or updated version will be provided for an additional expense or free as determined by Cinegration.
