Overview/Features

Transform your viewing experience with the MV-4K-4X1, the ultimate 4K multi-view video processor. Effortlessly display up to four 4K/UHD video signals on a single screen with stunning 60Hz clarity. Choose from different layouts, and select what input displays on each display tile!

The accompanying Layout driver for the LightSpeed MV-4K-4X1 will allow you to add UI buttons to navigators for swapping to layout prests configured in Composer.

- 6 layouts to choose from including Original, PIP, Dual-View, H, Quad, Master
- Automaticly binds itself to the main LightSpeed MV-4K-4X1 driver for communication to the device

Dealer Notes

- For automatic binding of the buttons to work correctly, the main LightSpeed MV-4K-4X1 should be installed and configured before adding this driver to the project
- PIP Position Property will only display if PIP is selected

Driver Setup

1. Make sure the main LightSpeed MV-4K-4X1 is already in the project and configured properly before adding the layout driver
2. Add layout driver to project
3. Configure the buttons preset as desired
4. Refresh Navigators

Driver Properties

- *Driver Status:* Displays driver related information

- *Driver Version:* Displays driver version
- *Debug Mode:* Displays additional information on the Lua tab for debugging purposes

Layout Button Settings

Supported Layouts

- *Icon Style:* Set which layout you want to be selected on button press
- *PIP Position:* If the Icon Style is set to PIP, here you can set the position of the PIP for the layout
- *Select Input 1-4:* Set which input dispays in each tile for the selected Layout/Icon Style
