

## CONTACT SENSOR PROGRAMMER DRIVER

This driver enables you to manage the state of Control4 Contact Sensors via programming.

---

### INSTRUCTIONS

- It is useful to turn Debug Mode On when using this driver. This will help identify issues.
- Specify the default sensor state.
- Add the appropriate Control4 Sensor devices to your project and connect them to the CONTACT\_SENSOR bindings.
- Use programming commands to set Sensor states. A similar Action may be useful for testing.

---

### SUPPORT

For support on this driver please go to <http://www.observo.ca/support/>. Give a detailed description of the problem and also include the version number of the driver and the version of Control4 OS that you are using.

---

### AUTO UPDATE

This driver is updated with fixes and new features from time to time. To ensure your project uses the latest version, set the Automatic Updates property of the thermostat driver to On.

---

### CHANGELOG
