

DIWODO : Elite solutions for amazing clients

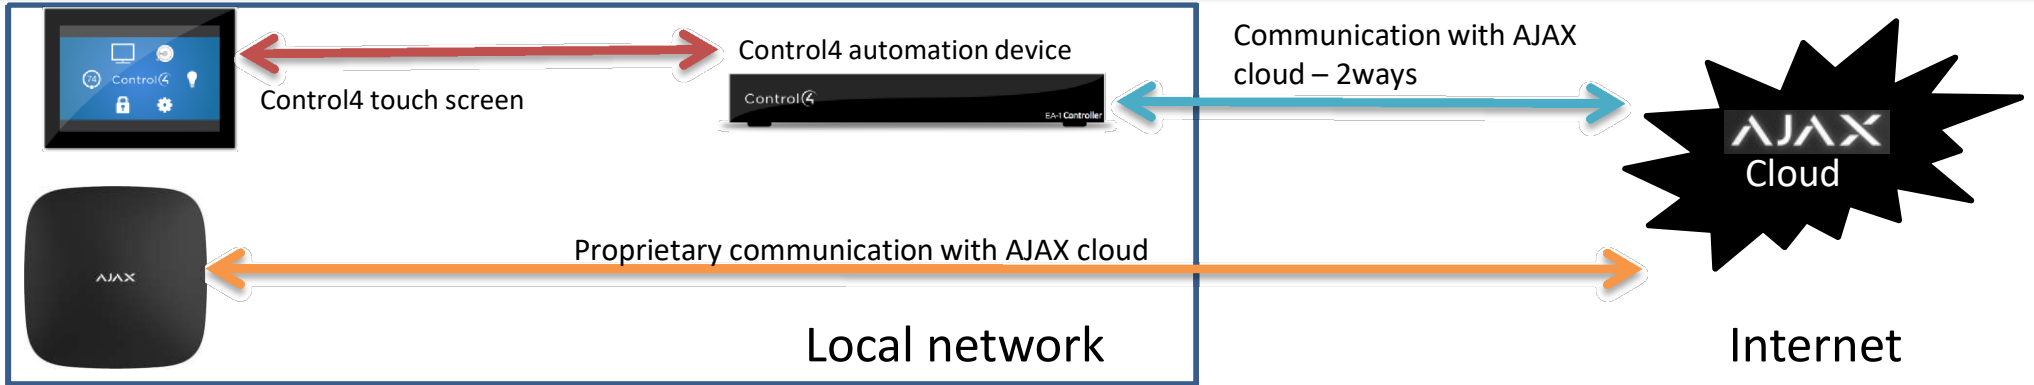

AJAX Systems with Control4 support

The AJAX logo, consisting of the word 'AJAX' in a bold, white, sans-serif font with a modern, slightly italicized feel, set against a dark grey rectangular background.

System Architecture

Control 4 automation device communicates to AJAX Cloud

User account must have only user rights (not ADMIN or PRO) to ensure highest security

AJAX System remain independant from the Control4 driver suite

Failures of the Control4 system does not prevent AJAX System to work, in that case only Control4 is not operating.

Hub Series driver (main driver)

- All Hubs support

Hub 1
Hub 1 Plus

Hub 2
Hub 2 Plus

100% Cloud Connected

Synchronized with your system

Zones support

Retrieve and display all zones

Import all sensors automatically on 1 click

Automatic driver bindings

Configure once on AJAX =
Import in Control4

Display all sensors in Locks & sensors

History display for all zones

Actions

- Arm
- Disarm
- Night Mode

Emergency functions

- Panic Mode

Hub Series Driver

Additional functions

- Virtual Keypad Support (program -ming)
- Light blink on alarm for 30 secs

UI Languages

English

French

German

Control 

FireProtect contact driver

 **Fire detection support**
FireProtect FireProtect Plus

 **Experience button**
Live contact feedback on UI button

 **Information display**

- Firmware version
- Is device Online?
- Is device being tampered?
- Battery level
- Potential issues detected on device
- Temperature on device area

 **Contacts detection**

- High temperature detection trigger
- Carbon Monoxide detection trigger*
- Smoke detection trigger*
- High temperature difference trigger

* FireProtect Plus only

 **Programming**

Up to 18 events

- Device online/offline
- Accelerometer malfunction
- Device tampered
- Battery errors
- Cabling issues
- Carbon Monoxide sensors
- Software malfunction

.... and more

Variables for device status

 **Thermostat**

- Embedded thermostat for room binding

LeakProtect contact driver

Leak detection

LeakProtect

Contacts detection

- Leak detection alarm trigger

Thermostat

- Embedded thermostat for room binding

Experience button

Live contact feedback on UI button

LeakProtect Contact Driver

Information display

- Firmware version
- Is device Online?
- Is device being tampered?
- Battery level
- Potential issues detected on device
- Temperature on device area

Programming

- Up to 18 events
- Device online/offline
- Accelerometer malfunction
- Device tampered
- Battery errors
- Cabling issues
- Carbon Monoxide sensors
- Software malfunction

.... and more

Variables for device status

GlassProtect contact driver

Glass break detection

GlassProtect MotionProtect Curtain

Contacts detection

- Glass break alarm trigger

Thermostat

- Embedded thermostat for room binding

Experience button

Live contact feedback on UI button

GlassProtect Contact Driver

Information display

- Firmware version
- Is device Online?
- Is device being tampered?
- Battery level
- Potential issues detected on device
- Temperature on device area

Programming

- Up to 18 events
- Device online/offline
 - Accelerometer malfunction
 - Device tampered
 - Battery errors
 - Cabling issues
 - Carbon Monoxide sensors
 - Software malfunction

.... and more

Variables for device status

MotionProtect contact driver

Motion detection

MotionCam Outdoor
MotionProtect Plus
DualCurtain Outdoor
MotionProtect Outdoor

Contacts detection

- Motion detection alarm trigger

Thermostat

- Embedded thermostat for room binding

Experience button

Live contact feedback on UI button

MotionProtect Contact Driver

Information display

- Firmware version
- Is device Online?
- Is device being tampered?
- Battery level
- Potential issues detected on device
- Temperature on device area

Programming

Up to 20 events

- Device online/offline
- Accelerometer malfunction
- Device tampered
- Battery errors
- Cabling issues
- Software malfunction
- Relay Opened/Closed

.... and more

Variables for device status

Control4[®]

Universal contact driver

Multiple detection

DoorProtect

DoorProtect Plus

Contacts detection

- Contact trigger
- Alternate contact trigger

Thermostat

- Embedded thermostat for room binding

Experience button

Live contact feedback on UI button

Universal Contact Driver

Information display

- Firmware version
- Is device Online?
- Is device being tampered?
- Battery level
- Potential issues detected on device
- Temperature on device area

Programming

- Up to 18 events
- Device online/offline
 - Accelerometer malfunction
 - Device tampered
 - Battery errors
 - Cabling issues
 - Carbon Monoxide sensors
 - Software malfunction

.... and more

Variables for device status

Control 4[®]

Relay driver

Relay Support

Socket WallSwitch Relay

Relay operations

- Relay Status Feedback
- Execute commands
 - Power ON
 - Power OFF
 - Power TOGGLE

Thermostat

- Embedded thermostat for room binding

Experience button

Live contact feedback on UI button
Execute toggle on select icon

Relay Plus Driver

Information display

- Firmware version
- Is device Online?
- Is device being tampered?
- Battery level
- Potential issues detected on device
- Temperature on device area
- Current voltage

Programming

- Up to 20 events
- Device online/offline
 - Accelerometer malfunction
 - Device tampered
 - Battery errors
 - Cabling issues
 - Software malfunction
 - Relay Opened/Closed

.... and more

Variables for device status

Relay driver

Keypad Support

Keypad Keypad Plus Keypad Combi

Experience button

Live contact feedback on UI button

Keypad Plus Driver

Information display

- Firmware version
- Is device Online?
- Is device being tampered?
- Battery level
- Potential issues detected on device

Programming

Up to 20 events

- Device online/offline
- Accelerometer malfunction
- Device tampered
- Battery errors
- Cabling issues
- Software malfunction

.... and more

Variables for device status

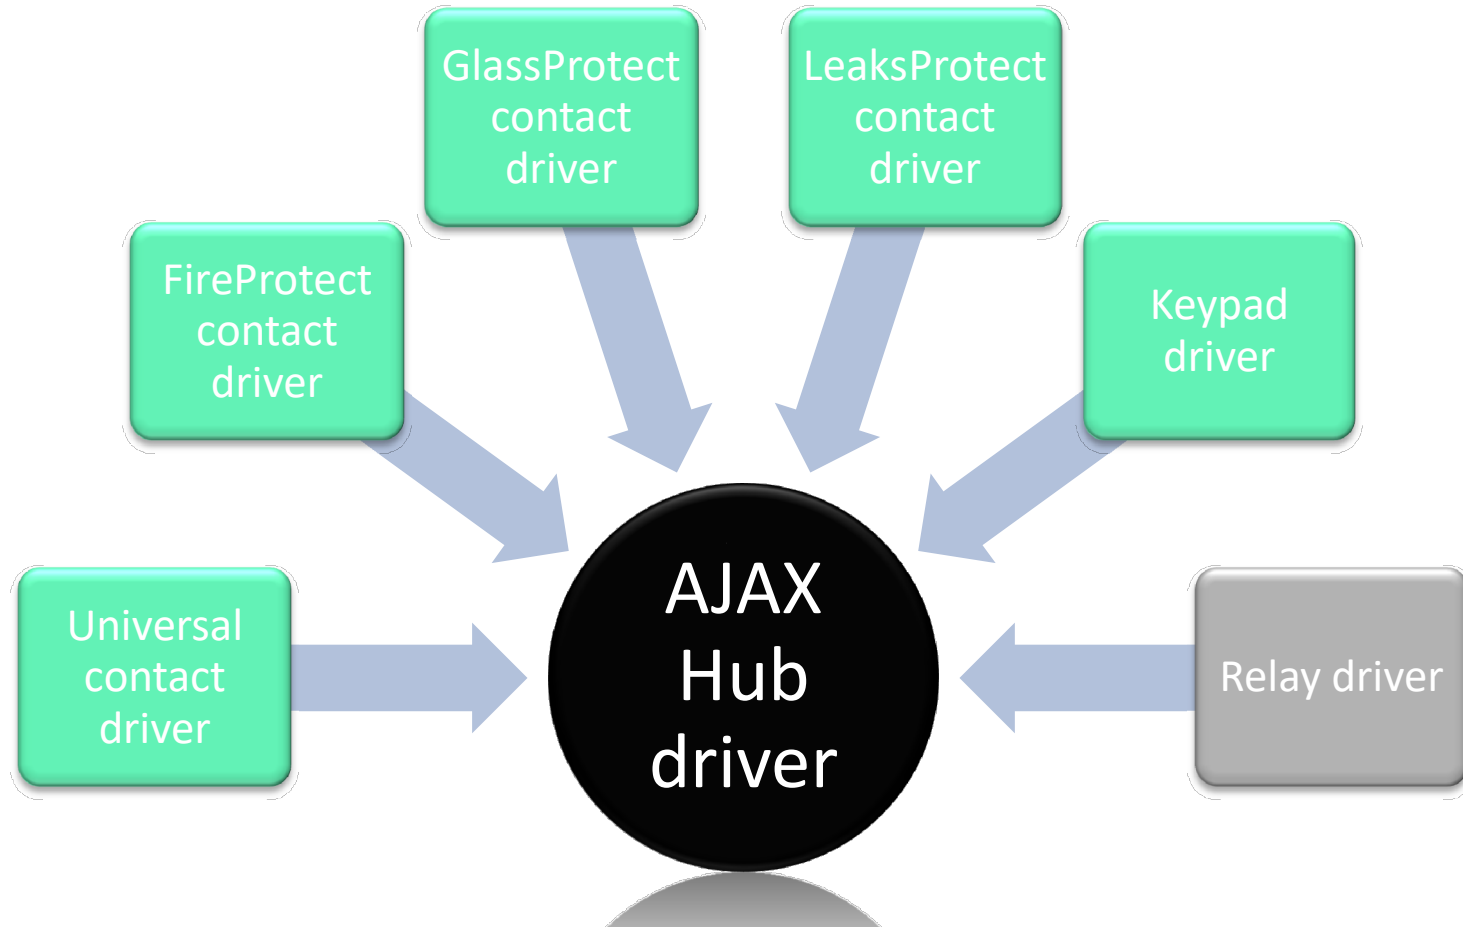

Thermostat

- Embedded thermostat for room binding

Control4

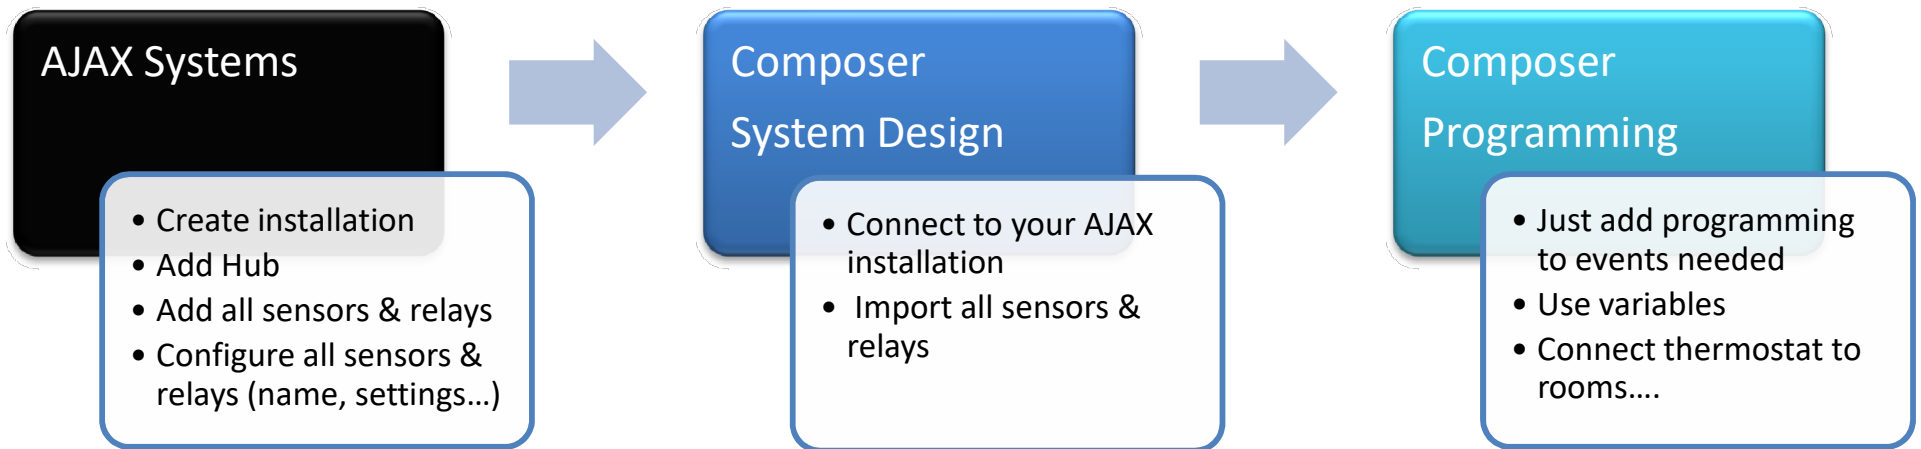

AJAX Systems Control4 driver architecture

Easy process : Automatic Zone import + drivers creation & bindings

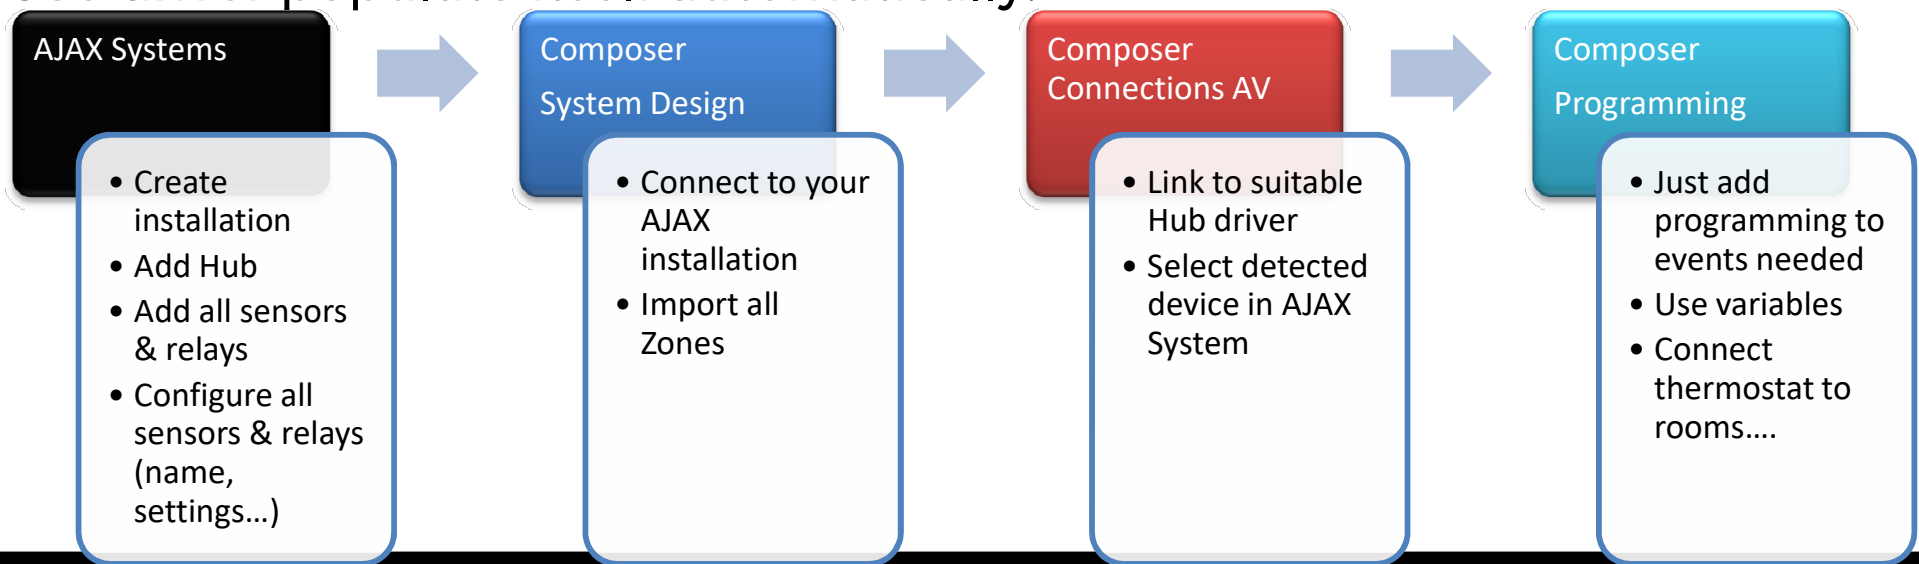

1. On your AJAX Systems configure all your device (use Desktop or mobile app)
2. Create a user account for your AJAX Systems installation
3. Add AJAX Hub Driver in Control4 installation
4. Authenticate using same credentials as step 2
5. Click import Zones, and see all drivers being added automatically!!!
6. See driver populate itself

Easy process : Manual creation of zones

1. On your AJAX Systems configure all your device (use Desktop or mobile app)
2. Create a user account for your AJAX Systems installation
3. Add AJAX Hub Driver in Control4 installation
4. Authenticate using same credentials as step 2
5. Click import Zones
6. Add Universal drivers, link to correct zone, and click Detect Zone
7. See driver populate itself automatically!

Question : How to have all drivers added automatically for the first time?

If AJAX Systems drivers have never been installed on the current Control4 director, an extra step is required :

-Create a new room and add all the following drivers, then remove the room.

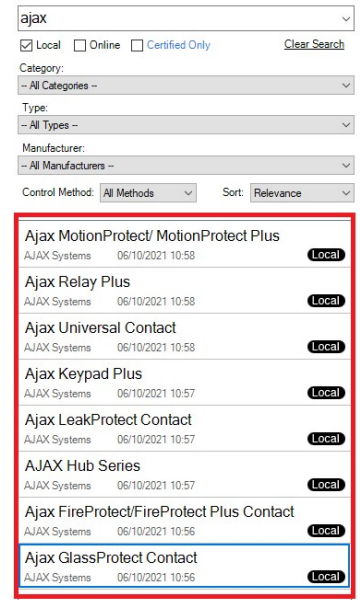

-All files will remain on Director's filesystem

-Then add only the Hub on the room you want, enter your credentials

-Import your zones....

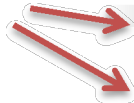

-If Ajax drivers have been added at least once on Director this step can be ignored

Ajax Hub driver quick overview

Auto rename

The screenshot shows the Ajax Hub driver configuration interface. On the left is a tree view with a 'Room' folder containing 'AJAX Hub 2' and 'Ajax Systems Partition'. Below these are various devices: 'fireprotect', 'door contact', 'kepad', and 'motion detector with cam'. On the right is a settings panel with tabs for 'Partitions' and 'Zones'. The 'Partitions' tab shows a table with one partition: 'Ajax Systems Partition' with state 'DISARMED_READY', 'Arm Type' empty, and 'Enabled' set to 'True'. Below this is the 'Advanced Properties' section with tabs for 'Properties', 'Documentation', and 'Lua'. The 'Properties' tab contains various settings: 'Debug Mode' (Off), 'Cloud Status' (License Activated), 'Automatic Updates' (Off), 'Cloud login' (ajax@ajaxsystems.com), 'Cloud password' (masked), 'Detected Hub List' (empty), 'Auto rename device' (No), 'Polling Timer (seconds)' (50), 'Partition Disarm User Code' (0000), 'Zone entry delay (seconds)' (10), 'Zone exit delay (seconds)' (10), 'Automatic Device creation (on imp)' (Yes), 'Locale display' (English), and 'Lights to flash on Alarm' (Select).

| # | Partition Name | Partition State | Arm Type | Enabled |
|---|------------------------|-----------------|----------|---------|
| 1 | Ajax Systems Partition | DISARMED_READY | | True |

AJAX Hub driver : Zones quick overview

Zones named after devices in AJAX installation

| # | Name | Type | State | Can Control |
|---|-----------------------------------|---------------|-------------------------------------|--------------------------|
| 1 | door contact [Zone_1] | Exterior Door | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2 | motion detector with cam [Zone_2] | Motion Sensor | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 4 | fireprotect [Zone_4] | Fire | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

Zones import

Automatic naming and binding for all zones

| Name | Type | Connection | Input/Output | Connected To |
|--|---------|---------------------|--------------|---|
| Control Outputs | | | | |
| door contact [Zone_1] Sensor | Control | CONTACT_SENSOR | Output | door contact->AJAX Contact Sensor |
| motion detector with cam [Zone_2] Sensor | Control | CONTACT_SENSOR | Output | motion detector with cam->AJAX Contact Sensor |
| fireprotect [Zone_4] Sensor | Control | CONTACT_SENSOR | Output | fireprotect->AJAX Contact Sensor |
| AJAX_SYSTEMS_PANEL | Control | AJAX_SYSTEMS_PAN... | Output | door contact->AJAX_SYSTEMS_PANEL, motion det... |
| Proxy | | | | |
| Security Panel | Proxy | SECURITY_PANEL | Output | AJAX Hub 2->Security Panel |
| Security Partition | Proxy | SECURITY | Output | Ajax Systems Partition->SECURITY |

AJAX Sensors / Relays / Keypad drivers

Information collected for all devices

| Advanced Properties | |
|----------------------------------|----------|
| Properties | Actions |
| Debug Mode | Off |
| Auto rename device | No |
| Informations | |
| Device name in AJAX Installation | kepad |
| Device Type | Keypad |
| Temperature F | 71,6 F |
| Temperature C | 22,0 C |
| Firmware Version | 3.51.0.0 |
| Device Status | Online |
| Is Device Tampered | No |
| Battery Level | < 100 > |

Fahrenheit Celsius

Use Remote Temperature Sensor

Buttons: Locked Unlocked

Thermostat available for all devices

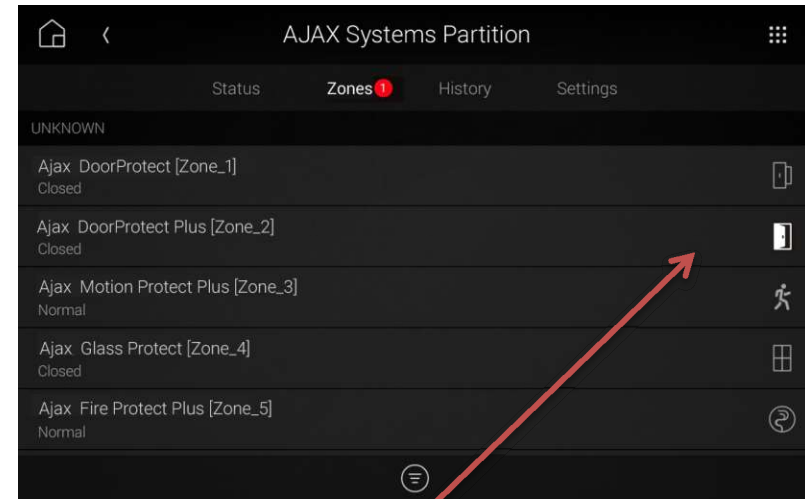

Binding possible with a room to have temperatures
