

White Paper: UniFi ViewPort

8.6.2023

Configuring UniFi ViewPort with additional 'views'

Create View on UniFi Protect

- Open UniFi Protect App and Select Live View
- Select the LiveView menu (center-bottom of window) and Select **Add Live View**
- Create your View
 - Setup Cameras, GRID Placement
 - Set Name
- Select Apply Changes
- Go back and Re-open the View you just created (edit / Pencil icon)
- Select Share
 - Enable **Share view with others**
 - Enable **Share on Viewport**
 - Select the Viewport that you want to this View to be added to

Share

Share view with others ⓘ

Share on Viewport

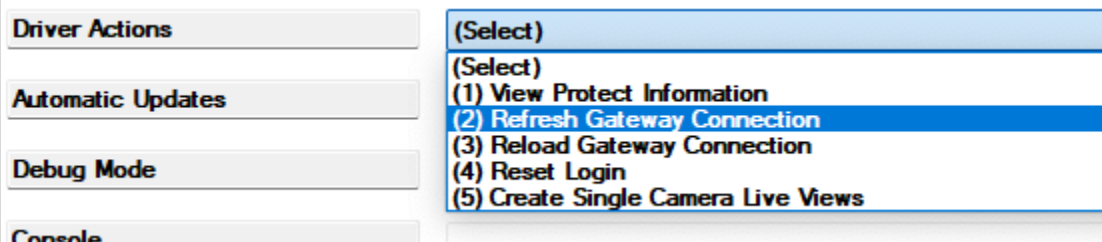

1 selected

UP ViewPort

- In Control4
 - Select the Protect Gateway Driver
 - Driver Action: *Refresh Gateway Connection*

The Driver now will have access to the **View** that was created.
