Matter Thermostat

Overview

This driver represents one Matter thermostat in Control4 and requires the **Matter Controller** gateway. Bind this driver's **Matter Controller** connection to the matching `MATTER_THERMOSTAT` provider on the gateway. **Auto Setup** can add and bind instances automatically.

Capabilities follow what the Matter device reports: HVAC modes, heat and cool setpoints, optional fan modes, and humidity when present. Temperature scale follows Control4 (°F / °C).

See the **Matter Controller** documentation for commissioning and gateway setup.

Properties

Property	Description
Cloud Status	DriverCentral license status (read-only)
Automatic Updates	Allow automatic driver updates when available
Driver Version	Packaged driver version (read-only)
Log Level	Logging verbosity; resets to Off after about 1 hour when not Off
Auto Rename Driver	When On (default), renames the driver in Composer to the Matter device name
Device Name	Name reported by the Matter device (read-only)
Device Type	Matter device type (read-only)
Serial Number	Device serial number when reported (read-only)

Bindings

Connection	Class	Notes
Matter Controller	`MATTER_THERMOSTAT`	Bind to the matching provider on the Matter Controller

Actions

Action	Description
Refresh Status	Asks the Matter Controller for the latest device state

Support

Changelog

v20261115 - 2026-11-15

Added

- Added support for the longer 21 digit setup code printed on some devices.

Fixed

- Fixed an issue where commissioning could stop working after a failed attempt on a controller with no devices yet.
- Fixed an issue where retrying commissioning right after a failed attempt (for example, a mistyped setup code) could time out until the device was reset.
- Fixed commissioning when more than one device in pairing mode matched the setup code.
- Improved the messages shown when commissioning fails, so they now say whether no device was found, the device stopped responding, or the setup code was rejected.

v20261113 - 2026-11-13

Added

- Added support for shades and blinds, including tilt.

v20260926 - 2026-09-26

Fixed

- Fixed an issue that could interrupt commissioning of some Matter devices.

Changed

- Improved discovery for Matter lights and switches, including Leviton.

v20260902 - 2026-09-02

Added

- Added support for thermostats.

v20260826 - 2026-08-26

Added

- Added support for in-wall switches and dimmers.

v20260806 - 2026-08-06

Added

- Initial release.
